

宁波39年老牌工厂里 探秘搬运车“瘦身”记

Explore the "Slimming" Process of the Forklift in XILIN

驾驶舱里最显眼的就是大大的触摸屏，所有的开关都藏在屏幕里。我们在调试师指点下，点击上升按钮，叉车一点点往上升，升得越高，速度越慢，在设定好的高度便自动停了下来，相当聪明。

“小白”也能开叉车。这也是储江想做的叉车。而无论是叉车的

Inside the cab of the forklift, the most prominent feature was a large touchscreen where all the switches were hidden. At the guidance of a debugging engineer, we clicked the "lift" button, and the forklift slowly lifted up until it reached a certain height, where it automatically stopped, demonstrating remarkable intelligence.

"Even novices can operate forklifts," said Chu Jiang. This is what he aims to achieve with his new forklifts. Whether it is the "intelligence" or the "slimness" of these new products, they embody years of hard work by more than 100 engineers at XILIN who have independently developed integrated control systems, redeveloped safety systems, undergone over 2000 tests, and completed nearly 100 versions of full-scale truck testing. For example, their reach stacker with a lifting

“聪明”还是“瘦高”，都凝聚着如意公司100多号工程师6年的心血，自主研发集成操作系统、重新开发安全系统、经过2000多次的测验、完成近100个版本的整车场地测试等。像起升高度可达14米的前移式叉车，已经是行业的天花板。

我们开始慢慢理解储江挂在

height of up to 14 meters is already at the industry's ceiling.

We began to understand Chu Jiang's frequent mention of "thinner" and "taller" products as a vivid description of how an old product strives to survive in a new era.

The Busiest Department

If you ask which department at XILIN is the busiest, it is not the R&D department or even the production department. The answer is actually a small department at XILIN called Intelligent Logistics Department. With only six employees in total, this department is tiny compared to XILIN's 1000+ employees.

We found Tian Feng, the head of the intelligent logistics department, who was immersed in his work in a spacious workshop covering an area of over 1000 square meters.

In front of him, a small

口中的“更瘦”“更高”，这实则是一个老产品向新生的生动写照。

最忙碌的工种

若要问如意公司哪个部门最忙?答案出乎我们的意料:既不是研发端,也不是生产端,而是如意公司最小的部门——智能物流部。整个部门加起来也就6个人,这在如意公司1000多个员工中,占比微乎其微。

我们在一个面积1000多平方米、空空旷旷的车间里,找到正在埋头工作的智能物流部部长田丰。

眼前,一张带着四个轮子、可来回推动的小小长方桌、一台电脑,就是田丰的办公配置。他的这套装备面朝几米远处的一台崭新叉车,叉车正来回行进,田丰则细致地观察了一会儿,又在电脑上

rectangular table with four wheels that can be pushed back and forth, a computer, is Tian Feng's working place. His set of equipment faces a brand new forklift several meters away, and the forklift is moving back and forth. Tian Feng observes carefully for a moment, and then fiddles with the computer for a while. He sees that the forklift is backing up

捣鼓一小会儿,只见那台叉车又倒退回去,重复刚才的动作,一遍又一遍……

“可以理解为,我们是让流水线上拷贝复制出来的叉车,变得充满个性,甚至独一无二的。”田丰这样向我们介绍自己的工种。

未完待续...

and repeating the same action again and again...

"It can be understood that we are making the forklifts that are copied on the assembly line become full of personality, even unique." Tian Feng introduced his job to us like this.

To be continued...
